

# GET SHED-UCATED!

Becoming a victim of shed theft can be both distressing and expensive. The good news is that nearly all thefts from sheds and out-houses can be prevented by upgrading security.

1. Ensure the shed is in good condition; replace any damaged or rotten areas with new wood.
2. Fit 2 heavy duty pad-bolts or hasps; a third down from the top and a third up from the bottom.
3. Use threaded coach-bolts with large washers or ideally backing plates to prevent the bolts being pulled through the wood; screws can easily be pulled out of the thin doors. Use large quality padlocks with hardened steel shackles.
4. Fit key operated locks on the corners of each opening window, or consider screwing them permanently shut from the inside if you never open them.
5. Fix mesh or bars on the inside of the windows.
6. Extend your house alarm if the out-house is attached to your building or purchase an inexpensive battery operated shed alarm.
7. Thread a chain through all garden tool handles, lawn mowers, cycles and other items and use a strong padlock.

# DIOGELWCH SIEDIAU!

Gall dioddef lladrad o'r sied fod yn gostus a gall achosi poen meddwl. Y newyddion da yw y gellir atal bron pob lladrad o siediau a chytiau drwy wella diogelwch.
